Webinar on Use of Reference Management System and Research Report Writing

Academic literature management and citation/reference management are preponderant prerequisites for enhancing research skills. Researchers may choose any tool for collecting and organizing resources. This Webinar would cover introduction to Reference Management Software, Managing References in Zotero. The software facilitates a variety of functions and features that are expected in a modern day reference management system. Participants would be able to get hands-on exposure to manage reference and insert citations while preparing manuscripts. On successful completion of this Webinar the participants will be able to extensively use Zotero reference management software for managing different types of resources.

Schedule of the Online Webinar:

Date	Time	Registration Link
